Subject: FW: Wolff-Alport Proposed Plan
Date: Friday, June 16, 2017 1:42:08 PM

Thank you for the opportunity to review the draft plan.

Comments for consideration:

Overall: Alternative 4, if funding is available, appears to be the most protective of public health and would result in unrestricted use.

Are the present tenants/business owners/proprietors considered members of the public? Thus they will be able to comment?

Pg 4 first sentence: it appeared thoron was also evaluated at the site and school and daycare and a driver in hazard ranking; perhaps that should be mentioned as part of the investigation.

Pg 7: left column 18th line: it is stated radon mitigation systems were installed... previous indication was that one system was installed. Please identify other buildings where radon mitigation systems were installed.

For future development at the site consider incorporating passive radon/vapor systems in design and construction.

For excavation, surveys of contaminated soils, community monitoring, disposal of soil/material, etc., ideally, a NYS licensed party or party working under reciprocity would be utilized.
